

BLAST CLEANING & FINISHING SYSTEM

Airless Swing Table Type Shot Blasting Machine

SMOOTH COMPLEXION FOR YOUR METAL SURFACE

Airless Shot Blasting Machine Swing Table Type MODEL: AST-1200

APPLICATIONS:

- Aesthetic Finishing of Die Casting of Aluminium, Zinc & Alloy Steels.
- Desanding & Descaling of Casting & Forgings.
- Cleaning of Castings & Forgings.
- Preparation of Surface for protective coating.
- Shot Peening of heavily stressed components.
- Removal of heat treated scales.

SWING TABLE TYPE MACHINE

The general purpose versatile swing table type machine is applicable for wide ranged larger sized medium or heavy weight castings, forgings, heat treated work, welded & bolted structures etc.

The different types of parts like transmission housings, engine blocks and heads, wheels and crank shafts can be blast cleaned. The machines are ideally suited for forgings, castings, and miscellaneous fabricated items for batch production with a mix of large & small items.

PCS manufactures wide range of door mounted 30" to 96" diameters swing tables type shot blasting machines having light weight capacity of 350 Kilograms To heavy weight capacity of 4500 Kilograms, weight components, which are the conventional, most economical low powered and commonly used machines by a small, medium and large scale foundries, heavy machineries as well as various types of industries.

Airless Shot Blasting Machine Swing Table Type MODEL AST-1800

To suit the requirement, the different models are available with various accessories like second door for additional productivity, either manganese or rubber linings on tables, doors and cabinet walls and either gravity type for low dust load or rotary screen type for screening of high sand & rust content dust generated along with fabric and pleated type bags dust collectors, which are operated by either mechanical shaker type or compressed air reverse pulse operated bags cleaning.
